TULSA METROPOLITAN AREA PLANNING COMMISSION
Meeting No. 2674
May 21, 2014, 1:30 PM
175 East 2nd Street, 2nd Level, One Technology Center
Tulsa City Council Chamber

CONSIDER, DISCUSS AND/OR TAKE ACTION ON:

Call to Order:

REPORTS:

Chairman's Report:

Worksession Report:

Director's Report:
Review TMAPC receipts for the month of April 2014

1. Minutes of May 7, 2014, Meeting No. 2673

CONSENT AGENDA:

All matters under "Consent" are considered by the Planning Commission to be routine and will be enacted by one motion. Any Planning Commission member may, however, remove an item by request.

2. **LC-575** (Lot-Combination) (CD-1) – Location: South of the southeast corner of West Apache Street and North Denver Place

3. **LC-576** (Lot-Combination) (CD-1) – Location: North of the northwest corner of West 46th Street North and North Elwood Avenue

4. **Change of Access** – Parts of Lot 2 and 3, Block 1, Amended Plat of Regency Center, Location: Northwest corner of East 51st Street South and South Mingo Drive, (CD-7)

5. **Z-7164-SP-1** – **Kaw Valley Engineering, Inc./The Walk at Tulsa Hills, LLC**, Location: Northeast corner of South Olympia Avenue and West 83rd Street, requesting a **Corridor Detail Site Plan** for a new grocery store in a Corridor District, CO, (CD-2)

6. **Legends on Memorial** – Final Plat, Location: East of South Memorial Drive and North of East 91st Street South, (CD 7)

CONSIDERATION OF ITEMS REMOVED FROM THE CONSENT AGENDA:
PUBLIC HEARINGS:

7. **The Preserve** – Preliminary Plat, Location: North of the northwest corner of East 131st Street and South Sheridan Road, (CD-8)

8. **The Estates at The River** – Preliminary Plat, Location: East of southeast corner of East 121st Street and South Yale Avenue, (CD-8)

9. **PUD-759 A** – Plat Waiver, Location: Northwest corner of the intersection of East 121st Street South and South Sheridan Road, (CD-8)

10. **Z-7263 – TMAPC**, Location: Berryhill Annexation Area/northwest corner of South 75th West Avenue and West 36th Street, Requesting rezoning from AG to RS-3, (CD-2)

11. **Z-7264 – CBC Builds, LLC/Harry D. Grande Sr.**, Location: East of South Madison Avenue between 38th Place and East 39th Street, Requesting rezoning from RS-3 to RS-4, (CD-9)

12. **Z-5620-SP-13 – EAN Holdings, LLC/Southwest Division**, Location: North of northeast corner of South Memorial Drive and East 93rd Street, Requesting a Corridor Development Plan to expand allowable uses for office use and automobile leasing/rental use, CO, (CD-7)

13. **CZ-432 – James Hayward**, Location: Northwest corner of West 61st Street and South Dip Creek Road, Requesting rezoning from IM to AG, (County)

OTHER BUSINESS

15. Update on Sector Plan Process (Tulsa Development Authority)

16. Commissioners' Comments

ADJOURN

CD = Council District

NOTE: If you require special accommodation pursuant to the Americans with Disabilities Act, please notify INCOG (918) 584-7526. Exhibits, Petitions, Pictures, etc., presented to the Planning Commission may be received and deposited in case files to be maintained at Land Development Services, INCOG. Ringing/sound on all cell phones and pagers must be turned off during the Planning Commission.
TMAPC Mission Statement: The Mission of the Tulsa Metropolitan Area Planning Commission (TMAPC) is to provide unbiased advice to the City Council and the County Commissioners on development and zoning matters, to provide a public forum that fosters public participation and transparency in land development and planning, to adopt and maintain a comprehensive plan for the metropolitan area, and to provide other planning, zoning and land division services that promote the harmonious development of the Tulsa Metropolitan Area and enhance and preserve the quality of life for the region’s current and future residents.

* Advertising, Signs & Postage Expenses for City of Tulsa Applications with Fee Waivers for Tulsa Development Authority, Tulsa Airport Authority, Pearl Dist. Based Code & Reinstating Previous Zoning of Recently Annexed Territory
Part of Lots 2 & 3, Block 1, Amended plat of Regency Center (CD 7)
Northwest corner of East 51st Street South and South Mingo Road

This application is made to allow a change of access along East 51st Street South by deleting two accesses, shifting one access further west, and adding an access. Along South Mingo Road the proposal is to shift two accesses and delete one access. The property is zoned CS.

Staff recommends approval of the change of access. The Traffic Engineer has reviewed and approved the request. Staff recommends APPROVAL of the change of access as submitted.

SECTION I: Z-7164-SP-1 Detailed Site Plan

STAFF RECOMMENDATION

CONCEPT STATEMENT:
The applicant is requesting detail site plan approval for a new grocery store in one, one story building on a 1.85 acre site in a Corridor District.

PERMITTED USES:
Uses permitted as a matter of right are Use Units 1, Area Wide Uses by Right; 10, Off Street Parking; 11, Offices and Studies, Including Drive-Thru Banking Facilities; 12, Entertainment and Eating Establishments, Other Than Drive-Ins; 13, Convenience Goods and Services; 14, Shopping Goods and Services; 15, Other Trade and Services, Limited to Dry Cleaning, Computer Repair, Data Processing Machine Repair and Electrical Repair Service; 18, Drive-In Restaurants; 19, Hotel, Motel and Recreational Facilities, Limited to Gymnasium, Motion Picture Theater (Enclosed) Health Club/Spa and Swimming Pool; 21, Limited to Private Streets, Service Roads, Storm Water Drainage, Storm Detention Facilities, Water Cisterns, Water Features, Wind Turbines and Open Spaces. Convenience Goods and Services proposed for this project are allowed by right.

DIMENSIONAL REQUIREMENTS:
The submitted site plan meets all applicable building height, floor area, density, open space, and setback limitations. No modifications of the previously approved Corridor Plan are required for approval of this site plan.

ARCHITECTURAL GUIDELINES:
The new buildings are not limited by architectural style in the Corridor Plan.

OFF-STREET PARKING AND VEHICULAR CIRCULATION:
The site plan exceeds the minimum parking defined in the Tulsa Zoning Code and the Corridor Plan.

LIGHTING:
Site lighting plans are provided. The plan illustrates a design that will meet the minimum standards outlined in the Corridor Plan and in the Zoning Code and shall be pointed down and away from adjacent property lines. All site lighting, including building mounted shall not exceed 35-feet in height. All site lighting shall be hooded and directed downward and away from the east and south boundaries of the project to the extent that light producing elements and reflectors will not be visible to a person standing at ground level within abutting residential districts or residually used property.
SIGNAGE:
The site plan does not appear to illustrate ground sign locations, but does illustrate wall sign locations which require a separate permit. All signage will be required to meet the Corridor Plan Development Standards. Any ground or monument signs placed in an easement will require a license agreement with the City prior to receiving a sign permit. This staff report does not remove the requirement for a separate sign plan review process.

SITE SCREENING AND LANDSCAPING:
The open space, landscape area and screening are consistent with the Corridor Plan Development requirements and meet the minimum standards of the Landscape portion of the Tulsa Zoning Code.

PEDESTRIAN ACCESS AND CIRCULATION:
The plan displays existing sidewalks along the full length of frontage of Olympia Avenue and West 83rd Street South. Per the development standards of the Corridor Plan, the site will be required to provide pedestrian access from the collector street sidewalks to the nearest building access. This is not currently shown on the proposed site plan.

MISCELLANEOUS SITE CONSIDERATIONS:
There are no concerns regarding the development of this area.

SUMMARY:
Staff has reviewed the applicant’s submittal of the site plan as it relates to the approved Z-7164-SP-1. The site plan submittal meets or exceeds the minimum requirements of the Corridor Plan. Staff finds that the uses and intensities proposed with this site plan are consistent with the approved Corridor Plan, and the stated purposes of the Corridor District section of the Zoning Code.

Exhibits included with staff recommendation:

INCOG zoning case aerial map
INCOG aerial photo
Applicants Site Plan
Applicants Landscape Plan
Applicants Electrical Site Plan
Applicants Exterior Elevations
Applicants Site Details

Staff recommends APPROVAL of the detail site plan for the proposed new Grocery Store.

(Note: Detail site plan approval does not constitute sign plan or landscape plan approval.)

5.3
The RSB-RCS/L Series rectangular shoebox is offered in a variety of lighting distributions with sharp cutoff to meet the challenging demands of today's site lighting projects.

**Fixture Specifications**

- One-piece formed aluminum housing
- Hydroformed aluminum reflector
- Die cast zinc latches permit tool-free entry
- High power factor ballast with -20°F starting
- Consult factory for glare shield options
- Lamp and arm included
- Flat tempered glass lens
- Luminaire finished in weatherproof powder-coat paint
- Available with photocell and polycarbonate shield
- Rotatable optics (RCL only)
- UL listed for wet locations

Laredo LMC-30LU LED
Medium-Size Wallpack

Laredo 30 LED medium size wallpack offers both wide spacing and excellent uniformity. The 30 LED unit is perfect for 15-18ft applications providing spacings of up to 80 feet between fixtures. The 30 LED unit is available in a wide Type III or forward throw Type IV beam.

The fixture is constructed of durable die-cast aluminum housing and door. The Laredo features a quick mount adapter that allows installation without ever opening the fixture. Save on installation time, fixture maintenance and energy!

APPLICATIONS
Full cut-off, IDA compliant perimeter lighting. Listed to UL1598 for use in wet locations when mounted aimed down.

Outdoor Lighting 525
Legends on Memorial - (CD 7)
East of South Memorial Drive and North of East 91st Street South

This plat consists of 2 Lots, 1 Block, on 2 acres.

Staff has received release letters for this plat and recommends APPROVAL of the Final Plat.
PRELIMINARY SUBDIVISION PLAT

The Preserve - (CD 8)
North of the northwest corner of East 131st Street and South Sheridan Road

This plat consists of 173 Lots, 9 Blocks, on 80 acres.

The following issues were discussed May 1, 2014, at the Technical Advisory Committee (TAC) meeting:

1. Zoning: The property is zoned RS-3. Lot sizes must be shown and meet the zoning district in which they are located. In this area the developers must acknowledge that there have been plans for a bridge crossing near Bixby and that the area may need to accommodate least terns and eagles and special habitats near the river. (See City of Bixby comments following.)

2. Streets: For the limits of no access, show the dimensions in the breaks in the Limits of No Access for the public streets, but do not label as “Access”. Typically public streets do not need to be identified as allowable access points. There needs to be dedication of all needed right-of-way to allow the east-west collector street to connect to the north-south collector street. Also clarify who will be responsible for constructing the final link and at what point. Use standard sidewalk language. Specific streets names should not be mentioned.

3. Sewer: Define what a B/U is in the legend. Reserve B must also be either a utility easement, or a sanitary sewer easement, since they have a sanitary sewer line located within the Reserve area. Provide a distance for the width of Reserve B somewhere behind Lot 19, Block 2. Provide the easement width along the west boundary line of Reserve A. Identify the width of the utility easement along the north line of Block 9. Continue the 30 foot utility easement along the east boundary of the plat, all the way through Lot 9, Block 6. The 7.5 boot utility easements in Lots 4 and 5, Block 6, need to be sanitary sewer easements with the pipe centered within the easement. If other utilities will use the easement, then the easement needs to be larger. In Section I A, add Walls to the Building Structures that are not allowed within the easement. Also, in Section I D 2, omit “and walls” where it occurs after Customary Screening Fences. Under section II M; Brick Stucco or Natural Stone Walls will not be allowed within a utility easement where a sanitary sewer line is located. Show the easement width for the off-site sanitary sewer line. In Blocks 4 and 9, extend the terminus manhole to a point where it can be accessed for service, without the manhole being enclosed within a fenced yard. Be sure the sewer line is deep enough to serve the entire basin. However, if the pipe exceeds 16 feet in depth, then another lateral will be required in order to meet the depth requirements.

4. Water: Along street roadways within the development a minimum utility easement width of 17.5 feet is requested. A 12 inch water main is required to be extended along South Sheridan Road from the existing 12 inch mainline north of East 126th Street South and placed in the appropriate right-of-way or easement. Add a blow off hydrant to the stub waterline to north.
5. **Storm Drainage:** Provide minimum finished floor elevations for the lots. Provide a note stating that the runoff from all lots will be conveyed through an offsite pond and then directly to the Arkansas River. The offsite pond must be placed in an appropriate easement and location of that easement must be shown on the face of plat and along with reference to the dedication document. Cover maintenance of the runoff conveyance system (pond?) to the river along with the maintenance of the reserve areas. Provisions must be made for the conveyance of floodwaters from the north and west since presently the waters flow through this property. Some proposed storm lines are not shown in easements. A minimum 15 foot easement is required.

6. **Utilities:** Telephone, Electric, Gas, Cable, Pipeline, Others: Additional and wider easements may be needed.

7. **Other:** Fire: Fire hydrant spacing shall meet the requirements of the International Fire Code 2009 section 507.5.

8. **Other:** GIS: Label Section line running north and south through middle of plat, remove or identify line running north and south of west street on sheet 2, label plat as to whether section corner pins were found or set or are the Section corners calculated, move location map to the upper right hand corner, need street names on final plat, need subdivision data control sheet.

Staff recommends **APPROVAL** of the Preliminary subdivision plat with the TAC recommendations and the special and standard conditions listed below.

**Waivers of Subdivision Regulations:**

1. None requested.

**Special Conditions:**

1. The concerns of the Development Services and Engineering Services staffs must be taken care of to their satisfaction.

**Standard Conditions:**

1. Utility easements shall meet the approval of the utilities. Coordinate with Subsurface Committee if underground plant is planned. Show additional easements as required. Existing easements shall be tied to or related to property line and/or lot lines.

2. Water and sanitary sewer plans shall be approved by the Public Works Department prior to release of final plat. (Include language for W/S facilities in covenants.)

3. Pavement or landscape repair within restricted water line, sewer line, or utility easements as a result of water or sewer line or other utility repairs due to breaks and failures shall be borne by the owner(s) of the lot(s).
4. Any request for creation of a Sewer Improvement District shall be submitted to the Public Works Department Engineer prior to release of final plat.

5. Paving and/or drainage plans (as required) shall be approved by the Public Works Department.

6. Any request for a Privately Financed Public Improvement (PFPI) shall be submitted to the Public Works Department.

7. A topography map shall be submitted for review by TAC (Subdivision Regulations). (Submit with drainage plans as directed.)

8. Street names shall be approved by the Public Works Department and shown on plat.

9. All curve data, including corner radii, shall be shown on final plat as applicable.

10. Bearings, or true N/S, etc., shall be shown on perimeter of land being platted or other bearings as directed by the County Engineer.

11. All adjacent streets, intersections and/or widths thereof shall be shown on plat.

12. It is recommended that the developer coordinate with the Public Works Department during the early stages of street construction concerning the ordering, purchase and installation of street marker signs. (Advisory, not a condition for plat release.)

13. It is recommended that the applicant and/or his engineer or developer coordinate with the Tulsa City/County Health Department for solid waste disposal, particularly during the construction phase and/or clearing of the project. Burning of solid waste is prohibited.

14. The method of sewage disposal and plans therefor shall be approved by the City/County Health Department. [Percolation tests (if applicable) are required prior to preliminary approval of plat.]

15. The owner(s) shall provide the following information on sewage disposal system if it is to be privately operated on each lot: type, size and general location. (This information to be included in restrictive covenants on plat.)

16. The method of water supply and plans therefor shall be approved by the City/County Health Department.

17. All lots, streets, building lines, easements, etc., shall be completely dimensioned.

18. The key or location map shall be complete.

19. A Corporation Commission letter, Certificate of Non-Development, or other records as may be on file, shall be provided concerning any oil and/or gas wells before plat is released. (A building line shall be shown on plat on any
20. A "Letter of Assurance" regarding installation of improvements shall be provided prior to release of final plat. (Including documents required under 3.6.5 Subdivision Regulations.)

21. Applicant is advised of his responsibility to contact the U.S. Army Corps of Engineers regarding Section 404 of the Clean Waters Act.

22. All other Subdivision Regulations shall be met prior to release of final plat.

23. All PUD standards and conditions shall be included in the covenants of the plat and adequate mechanisms established to assure initial and continued compliance with the standards and conditions.

24. Private streets shall be built to City or County standards (depending upon the jurisdiction in which the plat is located) and inspected and accepted by same prior to issuance of any building permits in the subdivision.
Hi Diane:

Regrets on the delayed response. City Engineer Jared Cottle responded, for “The Preserve,”:

“We previously met with the Engineers on this project. However, this project will require on-going coordination of grading and drainage operations at the storm water discharge will flow directly into Bixby.”

Jared’s comments on “The Estates at the River” are in the forwarded email below. I will emphasize that his response concerns only this first phase as represented.

From a planning standpoint, I support Jared’s comments on a future bridge connection, and also recommend that street names be coordinated with established street names on the east side of Sheridan Rd. I also generally support comments shared with by Dwayne Wilkerson (copied here) on 04/04/2014, especially as regarding coordination of accessibility, sidewalks along Sheridan Rd., drainage coordination, etc. I trust that floodplain and stormwater drainage issues are being handled expertly by design and City of Tulsa engineers, in concert with the City Engineer. This email will also respond to Dwayne’s email.

Hopefully this information is helpful. Please call or email if you have any questions or need additional information.

Erik Enyart

Subject: RE: Attached Image

Erik,

I don’t believe that we have any comments or objections on this version.

It encompasses only the area adjacent to 121st Street and provides room for a future connection to a South County Bridge.

Jared Cottle, City Engineer
City of Bixby
Ph: 918/366-4430
Fax: 918/366-4416
FYI on this one – let me know if you have any comments you want me to forward to TMAPC.

Erik

This is for TAC on May 1st.

PRELIMINARY SUBDIVISION PLAT

The Estates at The River - (CD 8)
East of Southeast corner of East 121st Street and South Yale Avenue

This plat consists of 89 Lots, 5 Blocks, on 31 acres.

The following issues were discussed May 1, 2014, at the Technical Advisory Committee (TAC) meeting:

1. **Zoning:** The property is zoned Planned Unit Development 803 (RS-3). Lot sizes must be shown and meet PUD requirements. In this area developers must acknowledge that there have been plans for a bridge crossing near Bixby and that the area may need to accommodate least terns and eagles and special habitats near the river. (See City of Bixby comments following.)

2. **Streets:** Right-of-ways should be called out as “Dedicated by this plat”. Provide radius for northeast corner. Use standard sidewalk language. For the limits of no access, show the dimensions in the breaks in the Limits of no Acess’s for the public streets, but do not label as “Access”.

3. **Sewer:** Add B/U and F/E to the legend. The 7.5 foot utility easement in Lots 7 and 8, Block 1 should be a sanitary sewer easement. Show the width of the utility easement along the south boundary of Block 2. In Section I add Walls to the Building Structures that are not allowed within the easement. Also, in Section I 3 2; omit “and walls” where it occurs after Customary Screening Fences. Under Section IV 4.13; Brick Stucco or Natural Stone Walls will not be allowed within a utility easement where a sanitary sewer line is located. In Blocks 4, 5 and 6, extend the terminus manhole to a point where it can be accessed for service, without the manhole being enclosed within a fenced yard. Be sure the sewer line is deep enough to serve the entire basin. However, if the pipe exceeds 16 inches in depth, then another lateral will be required in order to meet the depth requirements.

4. **Water:** Along street roadways within the development a minimum utility easement width of 17.5 feet is requested. Install the proposed water lines 8 feet off of property line. Add a blow off hydrant to the stub waterline to south. It is recommended that fire hydrants be installed at street intersection corners for reaching spacing requirements.

5. **Storm Drainage:** Provide minimum finished floor elevations for the lots. Floodplain issues such as detention and compensatory storage have not been, and must be addressed. Provisions must be made for the conveyance of floodwaters from the west since presently the waters flow through this property.

6. **Utilities:** Telephone, Electric, Gas, Cable, Pipeline, Others: Additional easements may be needed.

7. **Other:** Fire: The street along the east side of the development is a dead end street and will require a turnaround per the International Fire Code 2009
section D103.4.

8. **Other: GIS:** Label plat as to whether section corner pins were found or set or are the section corners calculated. Move location map to the upper right hand corner. Submit subdivision data control sheet.

Staff recommends **APPROVAL** of the Preliminary subdivision plat with the TAC recommendations and the special and standard conditions listed below.

**Waivers of Subdivision Regulations:**

1. None requested.

**Special Conditions:**

1. The concerns of the Development Services and Engineering Services staffs must be taken care of to their satisfaction.

**Standard Conditions:**

1. Utility easements shall meet the approval of the utilities. Coordinate with Subsurface Committee if underground plant is planned. Show additional easements as required. Existing easements shall be tied to or related to property line and/or lot lines.

2. Water and sanitary sewer plans shall be approved by the Public Works Department prior to release of final plat. (Include language for W/S facilities in covenants.)

3. Pavement or landscape repair within restricted water line, sewer line, or utility easements as a result of water or sewer line or other utility repairs due to breaks and failures shall be borne by the owner(s) of the lot(s).

4. Any request for creation of a Sewer Improvement District shall be submitted to the Public Works Department Engineer prior to release of final plat.

5. Paving and/or drainage plans (as required) shall be approved by the Public Works Department.

6. Any request for a Privately Financed Public Improvement (PFPI) shall be submitted to the Public Works Department.

7. A topography map shall be submitted for review by TAC (Subdivision Regulations). (Submit with drainage plans as directed.)

8. Street names shall be approved by the Public Works Department and shown on plat.

9. All curve data, including corner radii, shall be shown on final plat as applicable.
10. Bearings, or true N/S, etc., shall be shown on perimeter of land being platted or other bearings as directed by the County Engineer.

11. All adjacent streets, intersections and/or widths thereof shall be shown on plat.

12. It is recommended that the developer coordinate with the Public Works Department during the early stages of street construction concerning the ordering, purchase and installation of street marker signs. (Advisory, not a condition for plat release.)

13. It is recommended that the applicant and/or his engineer or developer coordinate with the Tulsa City/County Health Department for solid waste disposal, particularly during the construction phase and/or clearing of the project. Burning of solid waste is prohibited.

14. The method of sewage disposal and plans therefor shall be approved by the City/County Health Department. [Percolation tests (if applicable) are required prior to preliminary approval of plat.]

15. The owner(s) shall provide the following information on sewage disposal system if it is to be privately operated on each lot: type, size and general location. (This information to be included in restrictive covenants on plat.)

16. The method of water supply and plans therefor shall be approved by the City/County Health Department.

17. All lots, streets, building lines, easements, etc., shall be completely dimensioned.

18. The key or location map shall be complete.

19. A Corporation Commission letter, Certificate of Non-Development, or other records as may be on file, shall be provided concerning any oil and/or gas wells before plat is released. (A building line shall be shown on plat on any wells not officially plugged. If plugged, provide plugging records.)

20. A "Letter of Assurance" regarding installation of improvements shall be provided prior to release of final plat. (Including documents required under 3.6.5 Subdivision Regulations.)

21. Applicant is advised of his responsibility to contact the U.S. Army Corps of Engineers regarding Section 404 of the Clean Waters Act.

22. All other Subdivision Regulations shall be met prior to release of final plat.

23. All PUD standards and conditions shall be included in the covenants of the plat and adequate mechanisms established to assure initial and continued compliance with the standards and conditions.

24. Private streets shall be built to City or County standards (depending upon the jurisdiction in which the plat is located) and inspected and accepted by same prior to issuance of any building permits in the subdivision.
Hi Diane:

Regrets on the delayed response. City Engineer Jared Cottle responded, for “The Preserve,:”

“We previously met with the Engineers on this project. However, this project will require on-going coordination of grading and drainage operations at the storm water discharge will flow directly into Bixby.”

Jared’s comments on “The Estates at the River” are in the forwarded email below. I will emphasize that his response concerns only this first phase as represented.

From a planning standpoint, I support Jared’s comments on a future bridge connection, and also recommend that street names be coordinated with established street names on the east side of Sheridan Rd. I also generally support comments shared with by Dwayne Wilkerson (copied here) on 04/04/2014, especially as regarding coordination of accessibility, sidewalks along Sheridan Rd., drainage coordination, etc. I trust that floodplain and stormwater drainage issues are being handled expertly by design and City of Tulsa engineers, in concert with the City Engineer. This email will also respond to Dwayne’s email.

Hopefully this information is helpful. Please call or email if you have any questions or need additional information.

Erik Enyart

PLAT WAIVER

May 21, 2014

PUD 759 A –Northwest corner of the intersection of East 121st Street and South Sheridan Road (CD 8)

The platting requirement is being triggered by a major amendment to PUD 759 A.

Staff provides the following information from TAC for their May 1, 2014 meeting:

ZONING: TMAPC Staff: The property has been previously platted.

STREETS: No comment.

SEWER: No comment.

WATER: No comment.

STORMWATER: Floodplain atlas shows that most of the property lies within the Tulsa Regulatory Floodplain.

FIRE: No comment.

UTILITIES: No comment.

Staff recommends APPROVAL of the plat waiver for the platted property.

A YES answer to the following 3 questions would generally be FAVORABLE to a plat waiver:

1. Has Property previously been platted? X
2. Are there restrictive covenants contained in a previously filed plat? X
3. Is property adequately described by surrounding platted properties or street right-of-way? X

A YES answer to the remaining questions would generally NOT be favorable to a plat waiver:

4. Is right-of-way dedication required to comply with Major Street and Highway Plan? X
5. Would restrictive covenants be required to be filed by separate instrument if the plat were waived? X
6. Infrastructure requirements:
   a) Water
i. Is a main line water extension required? X
ii. Is an internal system or fire line required? X
iii. Are additional easements required? X

b) Sanitary Sewer
i. Is a main line extension required? X
ii. Is an internal system required? X
iii. Are additional easements required? X

b) Storm Sewer
i. Is a P.F.P.I. required? X
ii. Is an Overland Drainage Easement required? X
iii. Is on site detention required? X
iv. Are additional easements required? X

7. Floodplain
a) Does the property contain a City of Tulsa (Regulatory) Floodplain? X
b) Does the property contain a F.E.M.A. (Federal) Floodplain? X

8. Change of Access
a) Are revisions to existing access locations necessary? X

a) If yes, was plat recorded for the original P.U.D. X

10. Is this a Major Amendment to a P.U.D.? X
a) If yes, does the amendment make changes to the proposed physical development of the P.U.D.? X

11. Are mutual access easements needed to assure adequate access to the site? X

12. Are there existing or planned medians near the site which would necessitate additional right-of-way dedication or other special considerations? X

Note: If, after consideration of the above criteria, a plat waiver is granted on unplatted properties, a current ALTA/ACSM/NSPS Land Title Survey (and as subsequently revised) shall be required. Said survey shall be prepared in a recordable format and filed at the County Clerk’s office by the applicant.

10.1
SECTION I: Z-7263

At the February 19, 2014 meeting, the Planning Commission recommended approval of the rezoning for the Berryhill annexation area, Z-7253, as recommended by staff. At that meeting the fact that parcel #103 should be considered for rezoning was discussed. This parcel is currently vacant but was previously zoned RS (residential single family) in the County. It also has been platted as the Berryhill Estates addition.

The parcel map for the Berryhill annexation study showed the site as one large parcel because there has been no construction on the site. Through staff site visits the property was visibly vacant and undeveloped property. Due to these conditions, the parcel was recommended originally to remain AG (agricultural) zoning after its annexation. Staff has since discovered that Berryhill Estates was platted in 2004 and consists of 4 Lots, in 1 Block, on 29 acres. It is designed for large lot residential sites. Therefore, at staff’s request, the Planning Commission initiated this rezoning on March 10, 2014.

DETAILED STAFF RECOMMENDATION:

As the property was RS zoning in the County before the annexation, and has been properly platted, it should be considered for the appropriate RS-3 zoning in the City Limits.

Therefore, staff recommends APPROVAL of Z-7263 to rezone the property from AG to RS-3.

RELATIONSHIP TO THE COMPREHENSIVE PLAN:

Staff Summary: Comprehensive Plan designations for the property along the Expressway alignment may be determined through a future land use plan analysis in a subsequent phase of study for this area.

Land Use Vision:

Land Use designation: n/a

Growth and Stability: n/a

Transportation Vision:

Major Street and Highway Plan: Gilcrease Expressway alignment

Trail System Master Plan Considerations: N/A

DESCRIPTION OF EXISTING CONDITIONS:

Site Analysis: The subject property is approximately 21± acres in size and is located in the Berryhill Annexation area/ northwest corner of S. 75th W. Ave. and W. 36th St. The property is vacant and zoned AG.

Maps showing Berryhill Estates in context of the other recently annexed/rezoned property

SECTION III: Relevant Zoning History:

ZONING ORDINANCE: Ordinance number 22727 dated August 16, 2012, states the annexation into the City of Tulsa and established zoning for the subject property as AG.

** Resolution number 98254 dated September 15, 1980 established zoning for the subject properties when they were in the unincorporated Tulsa County limits.

Z-7253 April 2014: All concurred in approval of a request for rezoning 78+ acres of land, from AG to RS-3/ IL/ IM for purposes of rezoning the annexed property back to the original zoning when it was unincorporated Tulsa County limits, on property located within the Berryhill Annexation area.

BOA-21584 July 9, 2013: The Board of Adjustment approved a Special Exception to allow a manufactured home (Use Unit 9) in an AG district, subject to conceptual plan on 7.10 showing the proposed location of the home, all driving and parking surfaces are paved with a dust free all-weather surface, the manufactured home is to be skirted and tied down, with a time limit of 25 years from date of approval, on property located at 3330 S. 57th W. Ave. and also known as the subject property.
**Case Report Prepared by:**

*Atlas:* 249

**City Council District:** 9
*Councilor Name:* G. T. Bynum

**County Commission District:** 2
*Commissioner Name:* Karen Keith
SECTION I: Z-7264

DEVELOPMENT CONCEPT: The applicant has requested a rezoning from RS-3 to RS-4 in order to develop 6 single family lots on this site. The applicant intends to develop 50' wide lots, which is consistent with the pattern of the residential lot sizes in the surrounding area. The proposed single family lots will be oriented towards and face existing homes in the neighborhood.

DETAILED STAFF RECOMMENDATION:

The requested RS-4 zoning is consistent with the development pattern of the surrounding properties.

RS-4 zoning is non-injurious to proximate properties and will utilize an area where infrastructure already exists.

The requested RS-4 zoning is consistent with the vision of the Comprehensive Plan.

Therefore, staff recommends Approval of Z-7264 to rezone the property from RS-3 to RS-4.

SECTION II: Supporting Documentation

RELATIONSHIP TO THE COMPREHENSIVE PLAN:

Staff Summary: The requested zoning is consistent with the vision identified in the Comprehensive Plan for Existing Neighborhood and Area of Stability. It is envisioned that small scale infill will occur in these areas.

Land Use Vision:

Land Use Plan map designation:

The site has an Existing Neighborhood land use designation.

The Existing Residential Neighborhood category is intended to preserve and enhance Tulsa's existing single family neighborhoods. Development activities in these areas should be limited to the rehabilitation, improvement or replacement of existing homes, and small-scale infill projects, as permitted through clear and objective setback, height, and other development standards of the zoning code. In cooperation with the existing community, the city should make improvements to sidewalks, bicycle routes, and transit so residents can better access parks, schools, churches, and other civic amenities.

Areas of Stability and Growth designation:

The site is located in an Area of Stability.

The Areas of Stability includes approximately 75% of the city's total parcels. Existing residential neighborhoods, where change is expected to be minimal, make up a large proportion of the Areas of Stability. The ideal for the Areas of Stability is to identify and maintain the valued character of an area while accommodating the rehabilitation.
improvement or replacement of existing homes, and small scale infill projects. The concept of stability and growth is specifically designed to enhance the unique qualities of older neighborhoods that are looking for new ways to preserve their character and quality of life. The concept of stability and growth is specifically designed to enhance the unique qualities of older neighborhoods that are looking for new ways to preserve their character and quality of life.

**Transportation Vision:**

**Major Street and Highway Plan:**

East 38th Place and East 39th Street are considered residential streets. There are no provisions in the Major Street and Highway Plan for these streets or future street improvements.

**Trail System Master Plan Considerations:**

An existing multi-purpose trail system that extends across the region exists in RiverParks, which is less than one half mile from the site.

**Small Area Plan:**

The site is located within the Brookside Infill Neighborhood Plan area that was adopted in 2002. The Brookside Infill Development Design Recommendations (a component of the Brookside Infill Neighborhood Plan) predominately addresses recommendations for public improvements and commercial portions of Brookside. Exhibit 3 on page 8 of the document illustrates appropriate vs. inappropriate infill development in residential areas (see attached).

Since this is not a Planned Unit Development, there is no mechanism to regulate specific design features of future residential dwellings. However, existing zoning standards for RS-4 zoning will ensure appropriate height and setbacks for the district.

**DESCRIPTION OF EXISTING CONDITIONS:**

**Staff Summary:** The subject site is currently vacant and surrounded by 1950’s era single family homes. A single family home existed on the subject site that was destroyed by fire several years ago.

The existing RS-3 zoning district, which requires a minimum of 60’ wide lots, is prevalent in the surrounding area; however, the vast majority of the lots in the neighborhood do not meet this minimum and are non-conforming (see attached map showing surrounding lot sizes).

**Site Analysis:** The subject property is approximately 1± acres in size and is located east of S. Madison Ave between E. 38th Pl. and E. 39th St. The property is vacant and zoned RS-3.

**Surrounding Properties:** The subject tract is abutted on the east by north, south, east and west by single family homes, zoned RS-3.

SECTION III: Relevant Zoning History:

ZONING ORDINANCE: Ordinance number 11822 dated June 26, 1970, established zoning for the subject property.

BOA-16607 May 10, 1994: The Board of Adjustment DENIED a Special Exception to permit duplex dwelling finding that duplex use is comparable to spot zoning in this instance and is not compatible with the established residential neighborhood, on property located east of the southeast corner of E. 38th Pl. and S. Madison Ave. and also known as the subject property.
EXHIBIT 3 - RESIDENTIAL INFILL DEVELOPMENT

RESIDENTIAL INFILL DEVELOPMENT

Inappropriate Infill Building and Development in an Established Single-Family Neighborhood.

APPROPRIATE INFILL DEVELOPMENT

Scale - Relate size and proportions of new infill construction to adjacent buildings.

Height - Relate overall height and typical number of stories.

Setback - Conform to existing patterns of setback.

Rhythm - Some variety of wall areas with doors, windows, cornices and architectural features is appropriate when in character with area buildings.

Massing - Conform general to size and amount of space consumed by adjacent buildings.

INAPPROPRIATE INFILL DEVELOPMENT

Scale - Avoid buildings that in height, width or massing violate the scale of the area.

Height - Avoid new construction that varies greatly in height and number of stories.

Setback - Avoid violating the existing setback patterns in the area.

Massing - Avoid monolithic forms or forms which dramatically dominate space.

Rhythm - Avoid disrupting or violating general visual patterns.

**City Council District:** 7
- **Councilor Name:** Adrianna Moore

**County Commission District:** 3
- **Commissioner Name:** Ron Peters

**Case Number:** Z-5620-SP-13
**Hearing Date:** May 21, 2014
SECTION I: Z-5620-SP-13

DEVELOPMENT CONCEPT:

CORRIDOR DEVELOPMENT PLAN: Z-5020-SP-13

APPLICANT CONCEPT

The subject tract was originally constructed as shown on the attached site plan and landscape plan. There are no proposed changes being made to the plan except to bring the landscaping back to its original condition. The site is located south of the southeast corner of East 91st Street and South Memorial, and is zoned CO. The TMAPC and City Commission previously approved a Corridor Site Plan for an automobile insurance office and evaluation area. This development plan changes the allowed uses from an insurance office and evaluation area to all uses in Use Unit 11 and Use Unit 17 (but limited to car and light truck leasing and rental).

DEVELOPMENT STANDARDS:

Net land area: 2.88 acres

Uses Allowed:

Use Unit 17, (Automotive and Allied Activities but limited to car and light truck leasing and rental, light maintenance activities similar to windshield chip repair and minor door ding repair is allowed. Collision repair and heavy mechanic work is prohibited.

Use Unit 11, (Offices, Studios and Support Services)

Maximum Floor Area:

Office Area 9,295 sq. feet
Evaluation Area – 3 bays 1,307 sq. feet

Maximum Building Coverage: 16.3%

Maximum Building Height: 21 Feet

Minimum Parking Spaces: 75 spaces including display and storage for auto rental. Parking spaces for auto rental must meet the landscape standards defined in the landscape chapter of the zoning code.

Minimum Building Setbacks:

From Centerline of Memorial 150 feet
From North Property Line 22 feet
From South Property Line 29 feet
From East Limit of Development 118 feet

Signage: One 2’ wide by 10’ high sign on the 10’ pole not taller than 18’ above finished grade.
Landscaping: All landscaping shall be installed and maintained to confirm with the landscape plan approved in 1985 and attached to this document.

Sidewalks: Sidewalks meeting City Standards shall be constructed in the street right of way or green space between the right of way and parking area across the entire frontage of the lot.

EXHIBITS:

- INCOG Case map
- INCOG Aerial (small scale)
- Tulsa Comprehensive Plan Land Use Map
- Tulsa Comprehensive Plan Areas of Stability and Growth Map
- Applicant Exhibits
  - Original Site Plan approved in 1985:
  - Original Landscape Plan approved in 1985

DETAILED STAFF RECOMMENDATION:

The Corridor Development Plan is compatible with the existing site and all surrounding properties. South of this site is and existing apartment complex which is adjacent to the evaluation area on this property. The approval of Use Unit 17 can only be found compatible with limitations to the type of maintenance work provided at the facility.

Z-5620-SP-13 is consistent with the Tulsa Comprehensive Plan.

**Staff recommends Approval of Z-5620-SP-13 as outlined in Section I above.**

SECTION II: Supporting Documentation

RELATIONSHIP TO THE COMPREHENSIVE PLAN:

**Staff Summary:** The remodeling of the existing building and adding uses is consistent with the Comprehensive Plan designation of this area.

Land Use Vision:

**Land Use Plan map designation:**

Town Centers are medium-scale, one to five story mixed-use areas intended to serve a larger area of neighborhoods than Neighborhood Centers, with retail, dining, and services and employment. They can include apartments, condominiums, and townhouses with small lot single family homes at the edges. A Town Center also may contain offices that employ nearby residents. Town centers also serve as the main transit hub for surrounding neighborhoods, and can include plazas and squares for markets and events. These are pedestrian-oriented centers designed so visitors can park once and walk to number of destinations.

**Areas of Stability and Growth map designation:**

This is an Area of Growth which identifies area to direct the allocation of resources and channel growth to where it will be beneficial and can best improve access to jobs, housing, and
services with fewer and shorter auto trips. Areas of Growth are parts of the city where general agreement exists that development or redevelopment is beneficial. As steps are taken to plan for, and, in some cases, develop or redevelop these areas, ensuring that existing residents will not be displaced is a high priority. A major goal is to increase economic activity in the area to benefit existing residents and businesses, and where necessary, provide the stimulus to redevelop.

Areas of Growth are found throughout Tulsa. These areas have many different characteristics but some of the more common traits are in close proximity to or abutting an arterial street, major employment and industrial areas, or areas of the city with an abundance of vacant land. Also, several of the Areas of Growth are in or near downtown. Areas of Growth provide Tulsa with the opportunity to focus growth in a way that benefits the City as a whole. Development in these areas will provide housing choice and excellent access to efficient forms of transportation including walking, biking, transit, and the automobile.

Transportation Vision:

Major Street and Highway Plan:

The Major Street and Highway Plan has been implemented with the exception of sidewalks. This Corridor Development Plan will add sidewalks to this section of Memorial and connect to existing sidewalks immediately north of this building.

DESCRIPTION OF EXISTING CONDITIONS:

Site Analysis: The subject property is approximately 3+ acres in size and is located north of northeast corner S. Memorial Dr. and E. 93rd St. The property appears to be a vacant office building and is zoned CO.

Surrounding Properties: The subject tract is abutted on the east by vacant land zoned CO and PUD 704, on the north by a large used car dealership, zoned PUD 704; on the south by multi family residential, zoned CO; and on the west by large car dealerships, zoned PUD 405H and 405C

SECTION III: Relevant Zoning History:

ZONING ORDINANCE: Ordinance number 15232 dated December 11, 1981, established zoning for the subject property.
Subject Property:

Z-5620-SP-5 October 1985: All concurred in approval of a request for a Corridor Development Plan on a 3+ acre tract of land to increase permitted floor area, decrease some setbacks and amend screening requirements, on property located north of northeast corner S. Memorial Dr. and E. 93rd St.

Z-5620-SP-4 December 1984: All concurred in approval of a request for a Corridor Development Plan on a 3+ acre tract of land for an automobile insurance claims adjustment office with evaluation area, on property located north of northeast corner S. Memorial Dr. and E. 93rd St.

Surrounding Property:

PUD-704/ Z-5620-SP-12 May 2004: All concurred in approval of a proposed Planned Unit Development on a 12+ acre tract of land for commercial use, including sale of new and used automobiles and services and repair of automobiles, on property located south of southeast corner East 91st Street South and South Memorial Drive.

PUD-405-H June 2000: All concurred in approval of a request for a major amendment to PUD-405 to add 16,000 square feet of allowable floor area to the existing automobile dealership on Lot 5 to expand the business on the adjoining Lot 6. The property is located on the northeast corner of East 92nd Street and South 78th East Avenue.

PUD-405-C/ Z-5722-SP-5 April 1994: All concurred in approval of a proposed Planned Unit Development on a 5+ acre tract of land to add automobile and light truck sales and service uses to permitted uses in the Development Area 1-F, on property located on the southeast corner of East 92nd Street and South 78th East Avenue.

Z-5620-SP-1 June 1982: All concurred in approval of a request for a Corridor Development Plan on a tract of land for attached residential dwelling units, garden apartments and accessory uses. The proposal was broken up into 3 different Development Areas and only Development Area I was developed into the Sunchase Apartments, on property located the northeast corner of S. Memorial Dr. and E. 93rd St. and is abutting south of subject property.
Case Report Prepared by: Jay Hoyt

Owner and Applicant Information:
Applicant: James Hayward
Property Owner: Misc LLC

Applicant Proposal:
Existing Use: Vacant
Proposed Use: Residential
Concept summary:
Tract Size: 3.24± acres

Existing Zoning: IM
Proposed Zoning: AG

Comprehensive Plan:
Land Use Map: n/a
Areas of Stability and Growth Map: n/a

Staff Data:
TRS: 9033
CZM: 41
Atlas: 0

Staff Recommendation:
Staff recommends approval for the rezoning from IM to AG.

City Council District:
Councilor Name: n/a

County Commission District: 2
Commissioner Name: Karen Keith
SECTION I: Detailed Staff Recommendation

- The site is located in a lot designated by the City of Sand Springs Comprehensive plan 1999-2004 as High Intensity; however no development has occurred on this site. In addition, the site is surrounded on all sides by sites designated as Low Intensity – Residential. Staff has contacted the City of Sand Springs Planning Department who was of the thought that the proposed site is under the jurisdiction of the county and not subject to the jurisdiction of the City of Sand Springs.
- The IM zoning which currently exists appears to be specific to this undeveloped site with all adjacent sites being zoned AG.
- AG zoning is harmonious with the existing and expected development on the site and the existing surrounding properties.

Therefore staff recommends APPROVAL of CZ-432 for the rezoning from IM to AG.

SECTION II: Supporting Documentation

RELATIONSHIP TO THE COMPREHENSIVE PLAN:

This site is outside the limits of the Comprehensive Plan in the City of Tulsa and was not included in the Tulsa Metropolitan Area Comprehensive Plan. The site is within the limits of the City of Sand Springs Comprehensive Plan with a Land Use designation of High Intensity. The site is surrounded by Low Intensity-Residential use, with the High Intensity designation being specific to this property.

Site Analysis: The subject property is approximately 3.24± acres in size and is located Northwest corner of W. 61st St. and S. Dip Creek Rd. The property appears to be vacant and is zoned IM.

Surrounding Properties: The subject tract is abutted on the east by a single family residence, zoned AG; on the north by a single family residence and farmland, zoned AG; on the south by vacant land, zoned AG; and on the west by vacant land, zoned AG.

SECTION I:  PUD- 812

DEVELOPMENT CONCEPT:

The proposed Planned Unit Development (No. 812) to be known as “The Cottages at the Preserve” is comprised of 10.861 acres located north of the Northwest corner at 131st and South Sheridan Road - hereinafter referred to as the “Site”. This document proposes an new residential development within close proximity to many of South Tulsa’s newly planned developments, including the proposed Bixby public school and possible realignment of 121st Street. This project proposes a maximum of 53 detached single-family lots, which will integrate into an overall master plan, known as ‘The Preserve’. Anticipated lot sizes are 55-feet in width, with a lot area over 5,800 square feet. A portion of the required livability space for a lot may be contained within the common areas of the development.

The Cottages at the Preserve is in accordance with the assigned Tulsa Comprehensive Plan land use designation “New Neighborhood” and the current zoning class is RS-3 (Residential Single-Family). This subject property, as well as some of the adjacent tracts, is currently undergoing plat approval. Subdivision design will meet high standards of internal and external connectivity, as outlined by the City of Tulsa Comprehensive Plan text. To accommodate connectivity, several locations for passive recreation and trails have been planned in the area.

Two primary access points will be provided off of a proposed public street that is part of the pending “The Preserve” subdivision plat. “The Preserve” will have access to both South Sheridan Road and the newly proposed collector street. Streets within this PUD will be gated and therefore private.

The Cottages at the Preserve will prove to be an exciting new addition to the already highly-anticipated developments planned for the 121st and Sheridan area.

Tulsa Comprehensive Plan Land Use Map
Tulsa Comprehensive Plan Areas of Stability and Growth Map
Applicant Exhibits:
  Exhibit A: Aerial Photo and Surrounding Context
  Exhibit B: Conceptual Site Plan
  Exhibit C: Circulation Diagram
  Exhibit G: Connectivity Plan

PUD 812 DEVELOPMENT STANDARDS:

Gross Land Area: 473,095 sq.ft. 10.861 acres
Net Land Area: 422,777 sq.ft. 9.706 acres
Permitted Uses:
Uses permitted as a matter of right in RS-3, zoning district in the City of Tulsa Zoning Code, including landscaped features and secured entrances and recreational facilities and uses customarily accessory to permitted uses.

Maximum Number of Lots: 53 lots
Minimum Lot Width: 55 ft.
Minimum Lot Size: 5,800 sq.ft.
Minimum Livability Space Required (per lot): 4000 Sq. ft. *

Minimum Building Setbacks
Front yard: 20 ft.
Rear yard not abutting a public street: 15 ft.
Rear yard abutting a public street: 20 ft.
Side yard not abutting a private street: 5 ft.
Side yard abutting a private street: 15 ft. **

Maximum Building Height: 40 ft. ***

Maximum Front Yard Coverage by Parking: 40 %
Off Street Parking:
Minimum two (2) enclosed off-street parking spaces per dwelling unit.

Signage:
One (1) along the South Sheridan Road frontage, not to exceed 32 square feet each in size.

* Livability Space may be located on a lot or contained within common open space of the development. The face of the final plat will illustrate the livability space requirement for each lot and may be less than 4000 square feet.

** No garage access allowed on side yards abutting a private street.

*** Architectural features may extend a maximum of five (5) feet above the maximum permitted building height.

LANDSCAPING AND SCREENING.

In the case of double-frontage lots between the development and adjacent public streets, space for landscaping and screening will provided via fence easements.

Fencing or walls on the north and east perimeter of the PUD will be minimum 6’ height and masonry construction.
VEHICULAR ACCESS AND CIRCULATION:

The Cottages at The Preserve will have two primary access points off of the main public street which runs through "The Preserve" subdivision. Traffic will primarily come from South Sheridan Road to reach the site. Street within the property are gated, and therefore private. To create the density and street proportions, a 30-foot right-of-way with 26-feet of paving will be used.

PEDESTRIAN ACCESS:

The Cottages at The Preserve will provide sidewalks inside the subdivision and will ultimately connect to the sidewalk system on both sides of the proposed public street on the north edge of this PUD. Sidewalks will also be required on the east side of the project along South Sheridan in the street right of way. Sidewalks in the public street right of way will be constructed as part of the Infrastructure Development Plans prepared during Subdivision design and construction phase.

PLATTING REQUIREMENT

In accordance with Section 213 of the City of Tulsa Zoning Code, no building permit or occupancy permit shall be issued until a subdivision plat or plat waiver has been approved by the TMAPC. The community amenities such as the pool, clubhouse, or other items do not require detailed site plan approval through the Planning Commission.

EXPECTED SCHEDULE OF DEVELOPMENT

Development of the project is expected to commence and be completed as market conditions permit.

NEIGHBORHOOD IDENTIFICATION SIGN AND LIGHTING

As allowed in the Tulsa Zoning Code

DETAILED STAFF RECOMMENDATION:

Staff recommends Approval of PUD-812 as outlined in Section I above.

SECTION II: Supporting Documentation

RELATIONSHIP TO THE COMPREHENSIVE PLAN:

Staff Summary: PUD 812 is a new neighborhood and part of a much larger neighborhood that is being developed west and north side of the PUD. The PUD is a gated community and private streets. The private street network is not consistent with the connectivity vision of the Comprehensive Plan however provisions for future access south of the site have been included in the concept plan.
Land Use Vision:

Land Use Plan map designation:

The New Neighborhood is intended for new communities developed on vacant land. These neighborhoods are comprised primarily of single-family homes on a range of lot sizes, but can include townhouses and low-rise apartments or condominiums. These areas should be designed to meet high standards of internal and external connectivity, and shall be paired with an existing or new Neighborhood or Town Center.

Areas of Stability and Growth map designation:

The purpose of Areas of Growth is to direct the allocation of resources and channel growth to where it will be beneficial and can best improve access to jobs, housing, and services with fewer and shorter auto trips. Areas of Growth are parts of the city where general agreement exists that development or redevelopment is beneficial. As steps are taken to plan for, and, in some cases, develop or redevelop these areas, ensuring that existing residents will not be displaced is a high priority. A major goal is to increase economic activity in the area to benefit existing residents and businesses, and where necessary, provide the stimulus to redevelop.

Areas of Growth are found throughout Tulsa. These areas have many different characteristics but some of the more common traits are in close proximity to or abutting an arterial street, major employment and industrial areas, or areas of the city with an abundance of vacant land. Also, several of the Areas of Growth are in or near downtown. Areas of Growth provide Tulsa with the opportunity to focus growth in a way that benefits the City as a whole. Development in these areas will provide housing choice and excellent access to efficient forms of transportation including walking, biking, transit, and the automobile.

Transportation Vision:

The Comprehensive Plan designates South Sheridan as a secondary arterial street with no multi modal component.

This site is near the Arkansas River and the river trails system. Appropriate connections to the trail system should be part of the future development of this area.

The Major Street and Highway Plan also illustrates a residential collector street near the north property line of this tract. The residential collector will be required with future development on this site or in conjunction with the proposed Bixby school site immediately north of this development.

Major Street and Highway Plan:

This PUD does conflict with the Major Street and Highway Plan. The Plat process will require right of way dedication for ultimate plans for Sheridan Construction at this location.
Trail System Master Plan Considerations:

Plans for construction of interior sidewalks and sidewalks on the new street north of the PUD and along Sheridan will satisfy future connectivity concerns to the Trail system illustrated in Exhibit G.

DESCRIPTION OF EXISTING CONDITIONS:

Staff Summary: The existing site is near or adjacent to FEMA flood plain, there may be wetland considerations and storm water drainage will be an important consideration during the planning and design process however there is nothing in this PUD that cannot be implemented with sound engineering principals.

Site Analysis: The subject property is approximately 10+ acres in size and is located north of northwest corner of E. 131st St. and S. Sheridan Rd. The property appears to be vacant and is zoned RS-3.

Surrounding Properties: This site is in the middle of an area that is currently being developed in all directions and careful coordination of infrastructure will be required during the plat process. The subject tract is abutted on the east by the City of Bixby. An existing single family residential project is continuing to develop and is, zoned RS-4. North of this site is vacant land zoned AG, however a Bixby School is anticipated on that property. The school will require Board of Adjustment approval. South of this site is vacant land zoned AG with an abandoned sand plant. West of this site is a tract that has recently been zoned RS-3 with a PUD overlay anticipating gated communities with private streets; however, a north south residential collector will be part of future development. An east west residential collector on or near this site will ultimately connect to future development west of this site.

The south property is an abandoned sand extraction facility that was never restored. Engineering considerations and safety precautions beyond the minimal standards may be an important part of future development of this tract.
